

TECHNICAL DATA SHEET

TECHNISCHES DATENBLATT

Plastic Squeegee

DX RA 100

GENERAL INFORMATION

The universal DX RA 100 plastic squeegee is the perfect assistant for all related mounting jobs and bonds of self-adhesive films of all kinds. The plastic squeegee with felt DX100 is particularly flexible and transmits the pressure during bonding ideal to the film. A felt edge ensures that the film is not damaged or scratched during bonding.

SPECIAL FEATURES

- Very stable
- Extremely flexible
- Special felt with high durability and abrasion protection
- Felt edge prevents scratching of the Foil
- No discoloration of the surface in dry and wet application

SALES UNITS

Article-number:	Sales unit
GEZBDX100	1, 50 and 100 unit

Further Information

All data and information relate to the best of our knowledge and are based on measurement and experience. It remains in your responsibility to check the suitability of our yellow foil for the intended use of it. Our products are regularly quality-tested and further developed. We therefore reserve the right to adjust without additional information, the chemical composition or physical characteristics of new knowledge.
